

QUALITY POLICY

DyMac Global Limited operates primarily in the energy industry, an industry which insists on the highest possible standards in terms of product reliability, specification, traceability and transparency.

All at DyMac Global limited believe that quality is at the forefront of what we do. We are therefore committed to:-

- Forging long lasting customer relationships to better understand and respond to their business needs
- Continually reviewing and improving our business management system.
- Delivering the highest reliability products for the lowest total cost of ownership.
- Investing in our people and equipment to ensure Dymac Global Limited is a world class organization for design and manufacturing.

By doing this we will not only grow our business and maximize our potential in the market place, but we will achieve success based on our ability to delight our customers.
